What is Composting?

Composting is a natural process that breaks down organic material into a substance that is used to provide nutrients and improve soil structure.

Why Compost?

Composting has many environmental benefits and is an easy way for your family to be *green*. Not only will you reduce the amount of household garbage your family produces, but you will also stop *green* waste from filling up our landfills.

What We Offer

You will be provided with a 95 gallon cart, 24" wide x 35" deep x 43" high. Carts will be picked up once a month and, if you choose, you will be provided with a 20 litre bag of composted soil.

Pricing

A deposit for the cart will be required

With Soil \$20.00/month plus GST

Without Soil \$17.50/month plus GST

Ask about our special offers for strata, restaurants and apartment buildings.

What can/can't be Composted?

IN

From Inside

From Outside

- Fruit scraps
- Vegetable scraps
